Stand out in the crowd

As a company committed to enterprise mobility, S-Blox recognized the tremendous number of electronic files, emails, web pages, video files, and other forms of multi-media exchanged as part of a team's business process. These different files and formats represent 80% of total information shared by teams, open scattered in various silos, and thus challenging to unify and manage. To aid the challenges of these business process workflows, S-Blox is providing a Unified Communication (UC) cloud based solution which unifies teams with group collaboration and integrates disparate applications into the same centralized platform for the most efficient information management. Based on a fixed price per user per month, you maintain a highly transparent cost structure, flexibly adjustable as the needs of your organization evolve. By only paying for what you use, scaled to meet your current requirements, you allow the organization to switch from a capex to an opex business model and lower the total cost of ownership.

It is fully managed by S-Blox and offers a Disaster Recovery Solution. The Cloud UC provided by S-Blox offers you a new way to stand out in the crowd.

Ready for the future!

Interest in the cloud is here to stay. The ultimate cloud strategy therefore consists of moving your complete business process into the cloud.

Thanks to the S-Blox UC cloud solution, your organization gets immediate access to people, data and applications anytime, anywhere, on any device. A single unified platform combines different features: group chats, audio and video conferences, file sharing, file annotation, task management and more: all in single, integrated product accessible from any device, anywhere, and on any platform. Customers from a variety of backgrounds can begin to leverage these one-stop, team collaboration capabilities, as they greatly enhance business process for both private and public sector clients.

It's S-Blox's mission to help your organization optimize its business processes by integrating communication tools in an innovative, cost-predictable and cost-effective way. That is why we support all your current and future interactions - internal or external - anywhere, anytime and anyhow. Instead of having to deal with technical complexity, S-Blox allows your business to run more efficiently and smoothly by being your partner for all your connectivity and communication needs. We offer you one single service desk for all your fixed and mobile communication which helps you move away from the current hard-to-manage communication environment involving different contracts, SLAs, etc. S-Blox Cloud UC answers all your communication needs and makes your business environment a small and well-connected place!

S-Blox offers a range of collaboration solutions to ensure that your employees are accessible everywhere and have access to applications and data always. Our Cloud UC is the perfect solution if you are looking for a cost-effective, flexible and collaborative service.

Benefits

- **Gain flexibility and scalability.** Our Cloud UC solution is a modular, scalable solution which provides a quick and flexible response to your evolving needs.
- **Make your collaboration tools easily available to your employees.** S-Blox puts together different functionalities, allowing all your employees to communicate and collaborate as efficiently as possible. Give your users the ability to Meet, share content, add rich graphics and vocal annotations and hold conversations, etc.
- **Focus on your core business and control your TCO.** S-Blox Cloud UC uses a highly transparent cost structure based on a per-user pricing model. You pay a fixed amount per user per month, perfectly dimensioned to your current needs and highly adjustable as those needs evolve. You can save money by eliminating the traditional expenses for maintenance and energy while keeping control of your costs.
- **No need for an upfront investment.** You only pay for your use of the service; you don't have to invest in your own infrastructure and expertise. This allows you to switch from a capex to an opex business model.
- **No need for in-house expertise.** S-Blox deals with the management of this solution; you no longer need to

have in-house UC expertise to carry out updates or maintenance.

The challenge

- **Collaborate effectively with employees, customers, suppliers and partners** Communication is at the heart of your organization. One makes phone calls using PC's, runs applications and consults data on mobile phones. All collaboration tools should be available to all your employees at any time. Telephony remains the basis for making this possible, but so are chatting, e-mail, electronic document sharing and videoconferencing. There will no longer be any functional difference between fix and mobile telephones, PC's, tablets, etc.
- **Respond rapidly to internal and external changes** Your organization needs to keep up and adapt to the ever-changing environment with its ever-changing communication needs. To realize this, you need an infrastructure that is efficiently deployable, manageable and maintainable.
- **Keep control of costs** Your organization also needs to optimize its business processes and improve its business results while keeping costs low and time-to-market short.

The Solution

With Cloud UC, S-Blox focusses primarily on the convergence services for Telephony, Chat, File Sharing, Video Conferencing, Screen Sharing, File Annotation, Cloud Storage, Task Management, etc. so you can enjoy all the advantages of Unified Communications, without having to invest in your own infrastructure and UC expertise.

It transfers all the UC functionalities to the cloud and makes it available to everyone. S-Blox puts together different functional packages geared towards the concrete needs of your different employee profiles. S-Blox manages this solution. What matters is the service you get; you don't need to worry about how the things are done. This frees up your organization to focus more on core activities. Selfcare possibilities are offered via an S-Blox Portal. Depending on the type of user, 2 **different profiles** and features are possible, based on a **price per profile-model**.

Power Messenger

The capabilities include persistent 1-to-1 and multi-party chats, file sharing, rich annotation including voice tags, ad-hoc video creation for offline collaboration (known as "clips") and also rich file management capabilities.

Real Time Meetings

s-blox messenger users has the ability to create multi-party, real-time, voice and video conferences. File sharing, screen sharing, changing presenters and conference hosts are among the other capabilities available to s-blox users.

To-Do, task management for teams

Delegating and keeping track of responsibilities is easier than ever with our intuitive task management, a seamless part of our power messaging experience. Assign to-dos and deadlines to groups or individual members and attach relevant files, all within the context of a team conversation.

Pages

Over time the chat area might get quite lengthy and even though every item is time stamped and there is a global search I may not remember even the name of the file I am looking for 6 months or a year from now. With pages' tab I can view all of the content I ever uploaded in chronological order striped of the communications. I can select particular files and create folders for them.
